Subject: TBA response to comments
Attachments: RDX_SAB draft Suppl Info_09-07-16_HERO.DOCX; BaP-Supplemental Info-ERD_09-22-2014.docx

Hello TBA team!

I've started building the response to public comments section of the TBA supplemental information file, based upon the appendix from RDX (attached), which I just copied and pasted into the TBA draft materials, modifying as I went along. I've put some comments in this section to indicate that I've modified some (but not all) of the RDX language to reflex TBA-specifics, but that some RDX material remains - mostly to serve as an example for constructing the public comment summaries and EPA responses. Obviously, this remaining RDX material needs to be deleted before the document is sent along! And I've attached both the RDX and BAP supplemental info drafts to this email, if they are helpful in finishing the similar section for TBA.

I'm sorry Janice but I haven't gotten a chance to address any of the "other" comments. I have gone through made all the changes I think that are needed to the thyroid effects and MOA sections in the main draft body. I have also started entering the thyroid topic public comments and EPA responses from the Word table we've been working on, and I've entered in all the comments from the first subtopic ("high dose effects"), noting that in the Word table with a red-highlighted statement. Note that several of the comments in the later thyroid subtopics are referred back to these first few comment/response pairs, which should make entering them into the supplemental info draft easier.

I'll be back in the office on the 22nd. If there is some very urgent need, my cell phone number is
